---

This great little cart is just that, simple! It's great for any site that just needs to show the cart total in the header area or other small area of the site. I can be demo'd at the top of this page

The following is a quick list of features:

- Show cart total
- Shows number of products
- Loads with ajax
- Scrolls to top of the page on add

**I like what I see! I want to [JOIN TODAY](#) .**
