eShopper is designed around the popular e-commerce component, Virtuemart and can also very easily be used for any other type of website. This template has everything you would ever need to start or redesign your online store! It comes packed with tons of goodies, including 76 main template modules plus 4 mobile module positions for a total of 80 module positions, custom page and column widths, custom row widths, custom highlight color, Google fonts, dynamic module titles, customized S5 VM Accordion, mobile device support, stylized for Virtuemart, Tienda, K2 and JComments, and so much more! Be sure to check out all the features listed under the Features menu at the top of this page.

Not only are you getting a great template this month but you are also receiving our new module the S5 Simple Cart. This great little cart is just that, simple! It's great for any site that just needs to show the cart total in the header area .
