The S5 Media Player module is demo'd above this text. It is 100% flash based and does require flash to be installed for it to work. The module allows you to add up to 30 video clips/movies. It accepts FLV files and the popular MP4 file types. The module also has the following features:

Features:

- * Height and width can be set
- * Choose either dark or light theme
- * (NEW on 6/7/09) Choose a preview image to show before video is playing or when it's stopped
- * Set background color
- * Add up to 30 videos/media clips
- * Button Features: fullscreen, volume control, hide playlist
- * Playlist scrollbar will auto hide when videos don't exceed module height
- * Each video has the following options:
 - o Set video size ratio, 4:3, 16:9, etc
 - o Set video title
 - o Set description
 - o Enter video URL
 - o Enter thumbnail URL for video
