## Choose From 30 Preset Styles or Create Your Own In Seconds

Below is a full list of all 30 preset styles. You can simply choose one of these styles in the template configuration, modify an existing style, or create your own all in a matter of seconds!

- [Click here to learn how to create your own custom color scheme or edit a preset style in seconds...](#)

Setting the Magnum Opus color theme couldn't be easier! Just choose one of the following three options:

### Choose a Preset Style

- In the template configuration choose whichever preset style you wish.
- For instructions on how to find the template configuration [click here](#).
- [Click here to learn how to create your header and logo](#).

### Edit a Preset Style

- In the template manager edit the HTML of the template.
- At 167 lines down you will see a section that starts with:

```
////////////////////////////////////  
// Preset styles
```

```
if ($s5_style == "style1") {  
    $s5_main_background_color = "666633";  
    $s5_top_bar_color = "242F64";  
    $s5_cpanel_login_bar_color = "8CB3D6";
```

```
$s5_small_line_under_cpanel_login_bar_color = "2C3339";  
$s5_footer_background_color = "2C3339";  
$s5_main_text_highlight_color = "278247";  
$s5_drop_down_menu_links_color = "26B945";  
$s5_drop_down_menu_active_link_color = "003466";  
$s5_header_font_color = "FFFFFF";  
$s5_cpanel_login_bar_font_color = "2C3339";  
$s5_footer_font_color = "FFFFFF";  
  
}
```

- Find the preset style you wish to change and edit the color codes as you desire. As you can see the variable names are very easy to understand.

- [Click here](#) to learn how to create your header and logo.

### Create Your Own Style!

- In the template configuration the first question you are presented with asks what style you would like to use. Choose custom.

- For instructions on how to find the template configuration [click here](#).

- At the bottom of the configuration there is a section dedicated to setting up custom color styles. Answer each question and you will have your own style in seconds!

- [Click here](#) to learn how to create your header and logo.

```
function open_learn_how() {  
document.getElementById("learn_how").style.display = "block";  
}
```
