

S5 Tab Show

Thursday, 09 October 2008

Last Updated Wednesday, 10 December 2008

The S5 Tab Show has now been converted to a module that can be used in any module position and in any template! It includes up to module positions and 3 display effects just like the S5 Frontpage Slide module. It holds up to 10 actual module positions so you can publish any of your favorite modules to one of the slides and keep your site clean and consolidated while giving it some eye candy. The following is a quick list of features that are included with the module:

- Choose Mootools slide in or S5 Effects snap in or fade in effects (Choose S5 Effects to guarantee no script conflicts)
- Set button backgrounds and hovers
- Holds up to 10 module positions
- Specify the width of the module
- XHTML Valid

The following is a screenshot of what the admin side of the module looks like:

Joomla 1.0 new module positions setup. Here's how you do it:

- Login to the backend of Joomla.
- Navigate through the menu system to Site/Template Manager/Module Positions
- Starting at the first blank position field enter s5_tab1 as a name.
- Continue adding s5_tab2, s5_tab3 in the next fields up to s5_tab10
- Click the save button in the upper right hand corner and you're done!

Joomla 1.5 new module positions setup. Here's how you do it:

- Open up the XML file included with the template you are using
- Locate the <positions> area
- Start adding new positions <position>s5_tab1</position> <position>s5_tab2</position>, etc all the way up to s5_tab10.
- Continue adding s5_fs_2, s5_fs_3 in the next fields up to s5_fs_10
- Click the save button in the upper right hand corner and you're done!

I like what I see! I want to JOIN TODAY.
