

NEW! S5 Tweets Module

Written by Administrator

Friday, 15 January 2010 20:24 - Last Updated Saturday, 13 March 2010 22:32

The New S5 Tweets module displays the latest tweets from a specific twitter.com username. As you can see from the screenshot below you can specify how many to show on the page at one time and also to hide or show the associated account twitter logo. This module is demo'd on the homepage of this template.

Screenshot of the admin side of the module:

A screenshot of the 'Module Parameters' form for the S5 Tweets module. The form is titled 'Module Parameters' and contains the following fields:

- 'Module Class Suffix' with a text input field.
- 'Enter your twitter.com username' with a text input field containing the value 'phage_5'.
- 'How many latest tweets to show' with a text input field containing the value '9'.
- 'Show Twitter Account Logo' with a dropdown menu set to 'No'.
