NOTE: We do not provide support for this extension. Please refer to the following for download and their site for support: <http://extensions.joomla.org/extensions/e-commerce/donations/3589>

Screenshot of the module when the site shaper is used (we made some edits to the module and they are included in the site shaper version):

Donation Thermometer is a module with an editable image of a thermometer similar to what you would have seen at Church fund raising drives. The original module was based on an open source script creation of Arkie.Net but has now been completely remodelled from the ground up eliminating the need for GD Library. The width, height, funding goal, current amount raised, date last updated and currency can all be adjusted in the module's parameters. As well as a few other options including caching, module suffix, html pre-text and post-text.
