

## NEW! S5 Tweets Module

Written by Administrator

Friday, 15 January 2010 20:24 - Last Updated Saturday, 13 March 2010 22:32

---

The New S5 Tweets module displays the latest tweets from a specific twitter.com username. As you can see from the screenshot below you can specify how many to show on the page at one time and also to hide or show the associated account twitter logo. This module is demo'd on the homepage of this template.

Screenshot of the admin side of the module:

The screenshot shows a form titled "Module Parameters" with the following fields:

- Module Class Suffix:
- Enter your twitter.com username:
- How many latest tweets to show:
- Show Twitter Account Logo: ☐

I like what I see! I want to [JOIN TODAY](#)
