---

Joomanager is a commercial / paid 3rd party component for Joomla. It is not available on Shape5.com nor do we provide support for the component. The component can be purchased at: <http://www.joomanager.com>. If you are a Shape 5 club member you can get a 20% off coupon in the downloads area of this template.

Although it is designed for Joomanager, the template will still function just like any other Shape 5 Joomla template, and can be used for sites other than realty without Joomanager.

Joomanager is a component for Joomla that is so flexible it allows you to create your own custom fields that will show on each item that is created in Joomanager. So for this template we created several fields that fit the "real estate" style theme of the template such as "bedrooms, bathrooms, square feet, property type, etc"

The search and other real estate functionality come from the Joomanager component available from Joomanager.com. We have a coupon available for 20% the purchase of Joomanager available for club members as the component is not included in the site shaper.

The modules used on the homepage of the site are as follows:

### Joomanager Browse:

Used in the first two positions of the s5 tab show module.

### Joomanager Featured:

Published to the bottom\_row2\_1 module position on the frontpage.

### Joomanager Search:

Published to the pos\_top\_row2\_1 module position on the frontpage.

A screenshot of the 'Joomanager Search' form. It contains several input fields and dropdown menus: 'Location' (text input), 'Bedrooms' (dropdown with 'Select to Browse'), 'Bathrooms' (dropdown with 'Select to Browse'), 'Property Type' (dropdown with 'Select to Browse'), 'Square Feet' (dropdown with 'Select to Browse'), and 'Price' (range input with '0' and 'To 0'). A 'Search' button is located at the bottom left.
