

S5 Drop Down Cart Installation

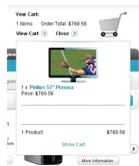

Written by Administrator

Friday, 10 April 2009 18:20 - Last Updated Thursday, 29 October 2009 18:15

The S5 Drop Down Cart module is demo'd at the top of this page.

Give your customers an easy way to view their cart with less page load time. This module was first released under our popular eTensity template and is back and even better! We've added ajax functionality and several other features that will allow you to adapt this module to any Virtuemart site.

[Click Here to add an item to the cart and see it in action](#)

List of Features:

- Updates with ajax functionality
- Set the height, width and margins of the module
- Customize backgrounds, font colors and sizes
- Set your own button text and titles
- Choose to open the cart automatically or disable
- Choose to scroll the page on add or disable

How to Install:

- Download the S5 Drop Down installation package from the downloads section
- Extract the file UNZIP_FIRST_mod_virtuemart_s5_dropdown_cart AJAX.zip to your local machine's desktop
 - Inside that file you will find the module's zipped installation file. Install the module through the backend of Joomla. For a tutorial on module installation [click here](#)
 - Once the module is installed there are two other files that must be uploaded via an ftp

client to your server, shop.s5_dropdown.php and productsnapshot.tpl.php

- Upload the file shop.s5_dropdown.php to the following folder
administrator/components/com_virtuemart/html/
- Upload the file productsnapshot.tpl.php to component/com_virtuemart/themes/ {your default virtuemart theme} /templates/common/
- Once you have completed the steps above publish your module to any position you desire.
