

Need Mobile Device Support?

No problem! This template comes with built in functionality to support popular mobile devices such as iPhone, Android, Blackberry, Windows Mobile and more. The mobile layout contains a mobile menu system, login and register functionality, and the following module positions: search, breadcrumb, mobile_top_1, mobile_top_2, mobile_bottom_1, and mobile_bottom_3. The mobile module positions are unique to the mobile device layout and will only show in this layout. Along with these functions users will also be presented an option to switch to the main PC version of the site. This feature can easily be enabled or disabled from the template configuration. **I like what I see! I want to JOIN TODAY .**
