New Page 1

Easily create your own custom background! Here's how it works:

1. Create your own custom background
2. Name the image s5_background.jpg
3. Upload the file to templates/sportopolis/images/ and over-write the existing one
4. In the template configuration area select a background repeat color that will cover the areas of the screen that the background image does not cover.

On this demo the black, carbon image is the s5_background.jpg image and grey is chosen for the repeat color as shown below
