

Joomla Tutorials

We are happy to announce that we now have some basic Joomla PDF tutorials available on our site! The tutorials will help you get started setting up a site shaper, installing a template/extensions, changing your logo and lastly setting up a database in phpmyadmin for a new Joomla install.

We hope these tutorials provide a helping hand in getting you started in the Joomla world. You don't have to be logged in to view just click the view button for whichever version you are running (current version includes 1.6 and 1.7):
