- 19. user8
- 20. user9
- 21. legals
- 22. bottom
- 23. debug

Custom Color Theme:

Magnum Opus is made almost entirely of transparent pngs. Because of this you can easily create your own color theme in seconds! In the backend of Joomla you simply choose from 1 of 30 preset styles of choose to create your own. If you

create your own you will be asked a series of very easy to follow questions that will allow you to setup your own color theme!

In Joomla 1.5 you can set your colors in the template parameters section of the Joomla admin.

Menu Styles:

Suckerfish Menu:

This menu is a Suckerfish menu system and is disabled by default but if you prefer to enable it you can set the menu to "2" in the "Template Configuration". In Joomla 1.5 will have the option in the template parameters.

S5 No-MooMenu:

The S5 No-MooMenu is completely powered by S5 Effects so your modules and components won't cause any conflicts using this menu system. Just mouse over the top menu in the demo of Magnum Opus and you will notice the suckerfish menu smoothly expand and fade in.

This month we have introduced a new fade in effect as well as drop-in effect. You can choose which effect you want very easily from the template configuration.

Don't want this fancy menu? Not a problem, you can switch to the standard suckerfish menu system in the template configuration.

Be sure to visit the demo page for a full list of features and tutorials.

If you still aren't sure or have any more questions don't hesitate to ask on the forum.
