

Comments Upgraded to Disqus

We recently changed our site commenting system to be powered by the Disqus system. We decided to make the switch over to Disqus due to the slow page loads we were experiencing on pages with large amounts of comments. The new Disqus system will make it easy for you to login with an existing Disqus account, Facebook, Twitter or Google account. In our old comment system replies and comments were all left aligned with no indentation. With Disqus the indentation makes the comment threads easier to read and join in on conversation to. We hope you enjoy the new addition to our site and that it improves your overall experience here. Please note: With this upgrade we unfortunately lost all the comments that were left via our old system. We were unable to import them. So go ahead and leave some nice comments for us to look at :) As always, be sure to give us your feedback and suggestions, we'd love to hear your ideas on how we can continue to advance and improve Shape 5!
