

Vertex 3.6 Has Been Released

We are excited to announce the immediate availability of Vertex 3.6 for Joomla 3.X! This new version fixes several bugs and adds several bits of new functionality to Vertex. Please be sure to read through the major changes listed below. To upgrade your Vertex installation please be sure to download the patch from:

http://www.shape5.com/component/option,com_docman/Itemid,96/task,cat_view/gid,190/

And please follow the upgrade patch tutorials from here:

http://www.shape5.com/joomla_tutorials.html

There are two major additions in Vertex 3.6:

1. Mobile devices can now pick from one of two layout options. The first option is the drop down method that we have used with responsive Vertex templates for a while now. The second option is new, and combine the search, login, register, menu and two module positions into a mobile sidebar. Both options come loaded with customization features.
2. Due to popular request we have also added a feature that allows you to turn off the login or register icons on mobile devices, but leave them enabled for desktop users.
