The Clarity template uses the default Joomla menu image feature to allow you to display images on the main s5 menu running across the top of the page:

In order to do so you need to navigate to the menus area of Joomla:

Next open up a menu item and once the admin area of the menu item loads you will see the following on the right hand side, select an image. NOTE: You will need to upload your images to the "images/stories/" folder in order for them to show in the drop down.

Width of large icons used in demo: 40pixels x 40pixels

Width of small icons used in demo: 16pixels x 16pixels
