The S5 Vertical Accordion module is demonstrated at the top of this page.

 This module contains up to 10 module positions that appear in an accordion function so you can publish any of your favorite modules or custom html modules to one of the accordion slides and keep your site clean and consolidated while giving it some eye candy.

 The following is a quick list of features that are included with the module:

  - Set the width of the module
  - Onclick or Onmouseover trigger methods
  - Auto cycle or manual for transition
  - Set slide transition speed
  - Compatible with IE7+, Firefox, Opera 10.5+, Safari, Chrome
