This month we are not only giving you a great template and great modules but   we've also created our own stylized Virtuemart theme to match the Shopper Frenzy   template perfectly! Along with a stylized theme we have also stylized the S5 VM   Accordion menu, Change Currency module, VM Search module, Featured Products module and Random Products module (these can   be seen on the homepage of this demo)

How To Setup The Theme:

   - Download the   Shopper Frenzy Virtuemart Theme package (shape5_shopper_frenzy_vm.zip) from the   Shopper Frenzy download section
   - Extract the contents of that zip file   to your local computer, this will reveal the folder s5_shopper_frenzy folder.   Upload this entire folder with an ftp client to components/com_virtuemart/themes/   on your server
   - Login to the backend of Joomla
   - Navigate to Components/Virtuemart
   - On the Virtuemart Menu click Admin/Configuration
   - Click the Site tab
   -    Under the drop down Select The Theme For Your Shop select s5_shopper_frenzy
   -    Click Save in the upper right

   I like what I see! I want to JOIN TODAY .
