The S5 Live Search module is demo'd at the top of this page.

Allow your users to search quickly and without loading or refreshing pages with our amazing new ajax search module! Simply publish the module to the 'search' position.

Note - The module shown on this demo was built specifically for Sportopolis and will not work with any other template. A universal live search module for use with all other templates will be released shortly.

List of Features:

- Set the amount of search results
- Choose the search order
- Choose the search phrase
- Set popup and inputbox width
- Set all text to your own text
- Fully powered by S5 Effects
