1. Create your own custom background. The background image should fade into a web safe

color. On our demo the background fades into color #000000.

3. Upload the file to templates/touch_of_soul/images/ and over-write the   existing one

4. In the template configuration area set the Background Repeat Color to the web safe color you

faded your image into in step 1. This color will show in the area your image cannot extend to.

4. While in the template configuration area set your highlight 1 and highlight 2 colors. These

colors control titles, module colors, text colors, and more.
