The S5 Image and Content Fader v2 is a big update to v1 this module now allows for multiple slide transition effects, navigation arrows and also a drop down gallery tab that allows you to select a slide via a thumbnail. The module still allows you publish your own content into each slide transition. The S5 Image and Content Fader v2 is powered by Mootools by default but still includes the S5 Effects library and allows you to use it in a "legacy module" if you are experiencing script conflicts. Best of all it's free!

NOTE: Legacy mode will display all your images, titles and slide text but includes limited functionality thus it does not include navigation arrows or the new drop down gallery tab.

Features at a glance:

- NEW horizontal sliding transition
- Choose between 4 slide transitions: Fade, Continuous Horizontal, Fade Slide Left, Continuous Vertical
- Specify height and width of module
- Includes a gallery tab drop down to show all images
- Each image slide can have its own hyperlink
- Show up to 10 images at once
- Publish your own content to each picture slide
- Navigation arrows
- Not all slides require titles

Admin side of the module:

The screenshot displays the configuration interface for the S5 Image and Content Fader v2 module. It is divided into two main sections: 'Module Parameters' and 'Other Parameters'.

Module Parameters:

- Pre-Text:** A text input field.
- Module Class Suffix:** A text input field with the value '-box'.
- Height:** A text input field with the value '312px'.
- Width:** A text input field with the value '454px'.
- Background Color (leave blank for none):** A text input field with the value 'e3f7fff'.
- Choose Mootools or Legacy Mode (S5 Effects):** Two radio buttons, with 'Mootools' selected.
- Choose your effect:** A dropdown menu with 'Fade' selected.
- Drop Tab:** A dropdown menu with 'Open Gallery' selected.
- Titles:** A list of 10 text input fields for slide titles. The first few contain: 'S5 Image and Conte', 'New Multibox Plays 1', 'Choose From Servers', 'Dark Chat Module', 'S5 Image Scroller', 'SEO Optimized', and the remaining three are empty.

Other Parameters:

- Image 1 Location URL:** A text input field with the value 'http://localhost/univ'.
- Image 1 Hyperlink URL (leave blank if none):** A text input field with the value 'http://www.google.co'.
- Image 1 Text:** A text area containing the message: 'The image and content fader has been updated to run off mootools and now includes a drop down gallery tab and navigation arrows.'
- Image 2 Location URL:** A text input field with the value 'http://localhost/univ'.
- Image 2 Hyperlink URL (leave blank if none):** An empty text input field.
- Image 2 Text:** A text area containing the message: 'New Multibook allows for images, flash, video, mp3, htm!'.
