

# Elegance Jomsocial Template

{social\_icons}

With the release of Jomsocial v1.6.290 there have been several updates to the templating structure from when we originally created our Jomsocial Elegance template. We have just updated our Jomsocial template to be fully compatible with the newest version 1.6.290. The template was completely rewritten from scratch based off of the new version. This update should resolve any problems that were arising with formatting and functionality issues.
