

## Joomla 1.6 Templates and Extension Conversion

{social\_icons}

You can reference this blog post to check the status on the conversion process of all Shape 5 Joomla products.

Please note - 1.5 to 1.6 conversions can take a considerable amount of time, each template is different, but we expect to have all of our templates converted in the next few weeks/months. Site shapers will not be available until all of our templates have been converted and some issues with the JUpgrade component are addressed or another suitable upgrade component becomes available.

Our conversion page has moved. [Click here](#) to proceed to the new page.
