

## January PhpBB3 Style - Aurora Dawn

{social\_icons}

This month's PhpBB3 style, Aurora Dawn, has been launched! Aurora Dawn's great design can be used for just about any type of website such as business, personal, or blog. With Aurora Dawn's great flexibility you can easily set your own custom highlight colors, which controls most link and title colors, and custom background images. In addition to these settings you can also set your own page and column widths, use fluid width and RTL languages. These features let you make your site truly your own look and style.
