

Free Joomla Template - Intrigue

{social_icons}

Intrigue is our latest free Joomla template release in honor of the release of Joomla 1.6! This template is fully compatible with native Joomla 1.6. It comes with great features that you wouldn't expect in a free template like a drop down suckerfish menu, custom column widths, custom page widths, fixed of fluid layout, and custom highlight and background colors; set the background bars to any color you want! Be sure to check out the demo for a live preview.

For more information on the Intrigue Free Joomla Template [click here](#).
