February PhpBB3 Style - Bridge of Hope

{social_icons}

The Bridge of Hope style is designed for any type of charity or band style websites. It includes the Vertex Framework version 2.0 that includes the frontend admin capability. You can add modules, menu items and config all styles features in the frontend. The template includes our standard s5 menu powered jQuery Javascript libraries. Features include: the ability to change the overall site and font color to any that you desire, choose fluid or pixel width and iPhone ready.
