March PhpBB3 Style - Comaxium

{social_icons}

 The Comaxium PhpBB3 style is built with style and functionality in mind. Its style can easily be adapted to just about any type of website you are running. With an amazing 35 block positions and 6 module styles it's functionality is superb and leaves you with hundreds of layout options to choose from!

  In addition to its great design there are other great features such as fixed of fluid width body settings, custom column and page width settings, choose your own highlight color, support for right to left languages, and so much more! Make sure to check out the demo for a full list of features.   For more information on the Comaxium PhpBB3 style click here
