

March Wordpress Theme - Phosphorus

{social_icons}

We are happy to announce the Phosphorus theme release! It is a very versatile theme that gives a wide variety of options. We have added some options to change the color scheme of Phosphorus to any you desire! Check out the 7 presets available to get an understanding of what you can do. This month we also slightly modified some of the WordPress link output to better match the theme itself.

Also included is a new admin interface for the theme, giving you an easier experience when changing theme options.
