

Please Welcome Paul Middleton To Shape5!

Please give a warm welcome to the newest member of the Shape5 team, Paul Middleton! Paul has been interning with us for a few months and we have officially hired him to take on his primary role of Joomla forum board moderation. Paul is a very educated web programmer and all around pleasant guy to work with! We think he will be a great addition to our team and a great to service to the entire Shape5 community in the forums! Paul began hard coding websites in the early 90's before any type of real CMS had taken form. Around the year 2002 he began transitioning into a CMS web design approach and finally settled with Joomla in 2009 and some Wordpress. He has never turned back! He has built several websites for large companies and ecommerce platforms for photographers. Paul has a very good knowledge of css styling and is great at debugging problems. Aside from web design Paul is also a photographer, and he has a very good eye for design! His knowledge of websites, his skills in css, and his great overall willingness to help is why we have brought him on board and we think the whole Shape5 community will benefit from him greatly! Again, please give him a warm welcome, either here on this post via the comments, on Facebook, or if you bump into him on the forum boards, and make him feel welcome as he settles into his new home at Shape5!
