

New Custom Services - Let Us Do The Work

We are extremely excited to announce a new feature of our website called Custom Services.

This service was designed specifically to help take the stress and frustration out of any projects you may be working on and pair you with an experienced Shape5 developer to get them completed much faster.

We have a variety of services that we offer with both fixed prices or quotes based on the type of work you are looking to get completed. All the work is completed in house by our development teams and nothing is ever outsourced to 3rd party companies. We highly recommend taking advantage of this service promptly as spaces may become limited very fast and trigger a priority queue.

This service is now officially live and can be viewed on the following link:

http://www.shape5.com/custom_services.html

If you have any questions about a specific service please fill out one of the forms at the above link and we will be in contact with you promptly.
