

Forte - Free Joomla Template

We are pleased to announce the release of Forte, a 100% free template for our Joomla users! Forte was designed to showcase off the many great features of our Vertex framework. It's clean design will adapt most any kind of website. Forte brings features and design that you would expect to see in a paid template, but we are offering this amazing template totally for free to introduce you to the power of our Vertex framework, which our paid templates are built on and share most of the same features.

This template comes with many great features such as: customized S5 Image and Content Fader styling, custom highlight color, custom font options, enable or disable uppercase letters, hide sub arrows, full control over the body shadow, adjust the background and row colors via the Vertex admin, and much more! The best feature of Forte though is that it is 100% free! Be sure to check out the demo to see this and all of the other great features in action!
