

Vertex 4 For WordPress Now Available

We are happy to announce that Vertex 4 for WordPress is now ready for download. You can head on over to the Vertex Framework download area, navigate to WordPress and grab the patch to upgrade your existing Vertex site to Vertex 4. Vertex 4 is completely backward compatible with previous Vertex themes, so you can continue using your old Vertex themes after patching!

You can read out more about the latest additions and features in our previous blog post here:
