

Weekend updates: 3 Joomla templates updated for Joomla 3.9.2 and S5 Weather module updated

This weekend, we are released updates for 3 Joomla templates and S5 Weather module for Joomla 3.9.2 compatibility and bug fixes.

Here is the list of the 15 templates getting updated in this batch.

- S5 Light Church
- S5 Light News Blog
- S5 Light Hex Corp
- S5 Weather Module

S5 Hexa Corp Template - Version 1.0.3

Hexa Corp is an extremely powerful, corporate, and general business Joomla template. This template is designed to attract customers and put valuable content in an easy to read layout. The header area features an html5 video with overlay text to grab your visitor's attention. Further down the page you will find areas where you can showcase a company's services, testimonials, staff, statistics, and much more.

- Cant load privacy content on popup on contact page
- Missing image of Read The Latest From Our Blog module on homepage

S5 Light Church Template - Version 1.0.4

new responsive Joomla template designed for a church. Of course the theme can be used for any website but we designed it to include features that are specific and beneficial to a church website layout. We did something a bit different this month with the Flex Menu. We went for minimal menu items with a large bold look. We then added an off screen right menu where you can add in additional menu items that you may need. The S5 Masonry module also had a minor update so you can choose to output images or DIVs with images set to the background. This allows for images to cover and fill the entire item area if needed.

- Mansory module displays error on light church homepage
- Cant load privacy content on popup on contact page

S5 News Blog Template - Version 1.0.3

The Pro news and blog Joomla template specially developed for news, blog and magazine websites. ou can always use it for any website but this was the general theme in the design and modules included. We've set the Image and Content Fader to article mode so it automatically pulls in all your articles in a specific category. But we've also added some features to article mode to display the category, author and publish date of each article if you wish

- Got error page when loading module id in the article
- Cant load privacy content on popup on contact page
