Weekend Updates: 12 templates updated to fix custom.css file issue when upgrading

This weekend, We are updating 12 Joomla templates packages for latest Joomla 3.9.3 and to fix custom.css file issue.

Case study:

Our templates allow user to add custom styles (CSS) to custom.css file and the file is included in the template by default, the issue happens when user upgrade template, the custom.css file will be overridden so the custom code added by user will be lost.

The issue has been fixed

We removed the custom.css file in the template package and quickstart package, when upgrading new version, your custom.css file will no longer be overridden.

Here is the list of the 12 templates quicksrtat packages getting updated in this batch.
